

The Biochemistry and Molecular Biology Seminar Series

Time: 12:00 – 1:00 pm

Place: UBC, Okanagan campus, ASC140

Date	Presenter		Presentation Title
May 26, 2011	Lily Kotzev	MSc Biology Graduate student UBC, Okanagan campus	Copper toxicity in <i>Aedes aegypti</i> larva with the application of a novel laser ablation method
June 23, 2011	Zerihun Demissie	PhD Biology Graduate student UBC, Okanagan campus	From large scale transcriptome profiling to biological network discovery: current techniques used in model and non-model organisms
	Brie Matier	MSc Biology Graduate student UBC, Okanagan campus	Cloning and expression of insect organic cation transporters (<i>orct</i> and <i>orct2</i>) from the fruit fly, <i>Drosophila melanogaster</i> Meigen
July 28, 2011	Adeline Delcambre		Collection of high resolution isotopic patterns of grape seed tannins by UHPLC-Q-TOF-MS in red wine
August 25, 2011	Caitlyn Makins		Radical generation and stabilization in Ornithine-4,5-aminomutase
September, 2011	Brie Matier		TBA
October 2011	Matt Glover		TBA
November, 2011	Nadia Sokal		TBA
December, 2011	Dawn Visintainer		TBA
January, 2012	Lukman Sarker		TBA
February, 2012	Mariana Galata		TBA
March, 2012	Caitlyn Makins		TBA
April, 2012	Carla Meints		TBA
May, 2012	Yann André		TBA
